THERMOSTATIC
CARTRIDGE

VT40SL

1 LEVER 2 FUNCTIONS

THERMOSTATIC & FLOW CONTROL WITH ONE HAND

The **VT40SL** is **the only product that combines all the advantages of thermostatics into one single lever cartridge**. This innovating product is a concentration of expertise and is made with high quality materials. It finally enables thermostatic technology to be used with one hand in every place where there is water.

ADVANTAGES

- ✓ One faucet handle to control both the temperature and the flow rate
- ✓ Regulation of the temperature remains stable in case of any pressure variation
- ✓ The thermostatic technology enables optimized water and energy consumption
- ✓ Standards size 40mm to replace any mechanical standard single lever cartridge
- ✓ Antiscald security in case of cold-water failure and no intercommunication hazards
- ✓ Easy integration and compact size

APPLICATIONS

The **VT40SL** has been designed to fit in different applications

- ✓ Washbasin
- ✓ Shower
- ✓ Bidet
- ✓ Kitchen sink

QUALITY

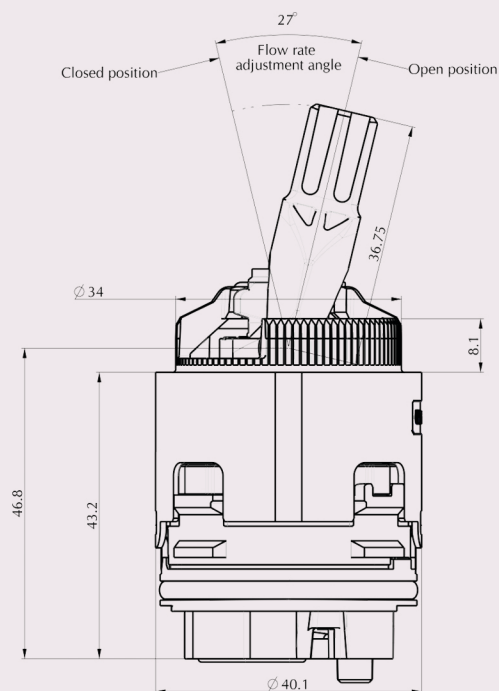

100% quality control :
each cartridge is individually
checked for leakage and
antiscald function
